(Defs. 1–6)
Incremental
composition
(Lemma 2)
Group compiler
T: (group, R) → groups
M: endpoint → group
Orchestrator labels (pods) · capability verifier (agents, servers)
labels → M (one write per event)
T, M
Data plane (enforcement points, default deny)
Pod → pod flow (src, dst, RPC type)
Agent → tool call (agent, server, tool, args); scope(args) → R
Decision
M[dst] in T[M[src]][R]
≈ 12 ns per call (Rust)
allow /
